Please type your abstract in English here. The abstract should include text, mathematical symbols and inline equations (for example $T_C = 500$ K, or $\mu_B = -e\hbar/2m_e$) only, with no figures, tables, or equation blocks.

The full length of the abstract text must fit fully within this text box, which can comfortably fit 2500 characters or 375 words, plus a few inline equations and citations. Citations [1] should be included, limited to a total of eight references [2]–[7].
