<b>5</b>	<b>Analysis and Discussion</b>	<b>3</b>
<b>6</b>	<b>Conclusions</b>	<b>3</b>

## 1 Objective

This section should briefly describe the main goals and objectives of the lab report.

## 2 Problem Description

Provide a detailed description of the problems or tasks tackled in the lab. This can include circuit specifications, structures, or any other given challenges.

## 3 Methodology

Detail the steps taken to design or implement the solution to the problem. Explain any algorithms, designs, or specific procedures used.

## 4 Measurement

Summarize the data gathered during the lab, including measurements and observations. You can use tables or figures to present this data.

Figure 1: Test results for circuit 1

## **5 Analysis and Discussion**

Interpret the results obtained. Compare them with theoretical values, explain discrepancies, and discuss their significance.

## **6 Conclusions**

Provide conclusions based on the results and discuss any recommendations for improvements, future work, or alternative solutions.
